PROFESSIONAL SUMMARY

Aspiring Cloud/DevOps Engineer with hands-on experience building and deploying AWS cloud solutions using S3, CloudFront, and Route 53. Skilled in CI/CD automation with GitHub Actions and Docker, with strong knowledge of Git, Linux/Bash, monitoring, and cloud deployment. Focused on building secure, scalable, and automated infrastructure that delivers reliable applications efficiently.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Backend: Spring Boot, Flask

Frontend: HTML5, CSS5, Javascript

Database: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Jenkins, Git, GitHub, CI/CD

PROJECTS

Cloud-Based Static Website Deployment

HTML, CSS, JavaScript, AWS S3, Route 53, Git, GitHub

Feb – April 2026

Designed and deployed a production-style static website on AWS with cloud hosting, CDN delivery, domain management, security, and monitoring.

- Built a responsive static website using HTML, CSS, and JavaScript with optimized frontend structure and cross-device compatibility.
- Deployed website assets to Amazon S3 and configured cloud-based static website hosting for scalable content delivery.
- Configured Amazon Route 53 and a custom domain with HTTPS to provide secure and reliable website access.
- Implemented Git/GitHub version control and maintained a structured source-code and deployment workflow.
- Configured monitoring and performance tracking to monitor website availability and identify potential deployment issues.
- Created technical documentation covering AWS architecture, deployment configuration, security settings, monitoring, screenshots, and troubleshooting procedures.

CI/CD Pipeline Automation System

Docker, GitHub Actions, Docker Hub, CI/CD, Linux, Bash, Git

May 2026 - Present

Designed an automated DevOps pipeline to build, test, containerize, and deploy applications with integrated version control and deployment monitoring.

- Designed and implemented a GitHub Actions CI/CD pipeline to automate application build, testing, Docker image creation, and deployment.
- Configured automated testing and validation on every code push and pull request to improve application reliability.
- Containerized the application using Docker, creating reproducible and portable deployment environments.
- Integrated Docker Hub as a container registry for automated image versioning, storage, and distribution.
- Implemented automated Docker image build and deployment workflows using GitHub Actions and deployment scripts.
- Configured pipeline logs and status monitoring to track build, test, and deployment stages and troubleshoot failures.
- Maintained the project using Git/GitHub and documented the complete CI/CD architecture, workflow configuration, Docker setup, and deployment process.

CERTIFICATIONS & ACHIEVEMENTS

- Cloud and DevOps Mastery** – Exlearn Technologies, Pune | Certificate ID: f6f4fde7-c67f-4e41-883c-6c1a134fa94b
- Data Analytics Job Simulation** - Deloitte
- Basics of Python** – Infosys | Springboard
- Government Certificate in Computer Typing** - Basic (GCC-TBC)
English Typing: 30 WPM (A Grade)

EDUCATION

B.B.A in Computer Application

2023 - 2026

Savitribai Phule Pune University, Pune | CGPA: 9.37/10.0
